

# Education and Training Materials Style Guide

Project Title	Education and Training Materials Style Guide
Project Summary	Create education and training material style guides that will be used as the default templates for all new course materials for the School of Applied Information Technology.
Country	United States

## Project Description

Education and training resources are provided in multiple formats. This project will be to simply gather existing Department style standards and apply them to the development of course print materials, presentation materials, banners, posters, and job aides.

## Required Skills or Interests

Skill(s)
Editing and proofreading
Educational design
Graphic design
Writing

## Additional Information

This is a great opportunity to work together as a part of a team that will leverage your stylistic ideas and your attention to detail. The final products will not only be seen by thousands of students each year, but will also enhance your portfolio of professional work products that you will be proud to display.

# Language Requirements

*None*
